

NEEDS OF THE SALMONID

MATERIALS:

note paper and pencil

"Environmental Needs of the salmonid Life Cycle Worksheet"¹

INFORMATION:

The salmonid has various needs at each stage of its life cycle.

eggs need porous gravel and a cool, even flow of water

alevins need porous gravel, cool water and oxygen percolation

fry need protection from predators, food supply, freshets, and unobstructed migration

smolts require a food supply, clean, even flow of water, and cover from predators

maturing salmonids need a food supply

returning salmonids need unobstructed migration, cold water, and good stream-bed conditions

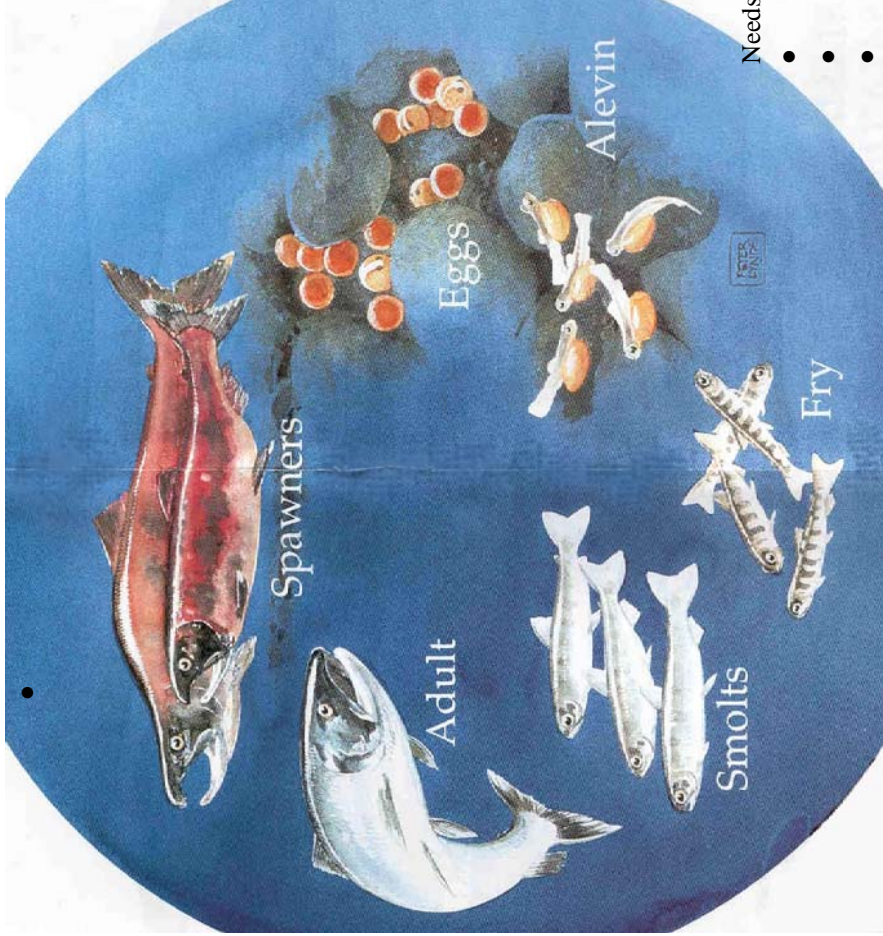

ACTIVITY:

- complete the "Environmental Needs of the Salmonid Life Cycle Worksheet"
